

HUSK EXTRUDER

FHE-300

NPT GROUP NHAN PHONG THAI CO LTD.

Husk

Wood

Spare Parts

FEATURES:

- The **Husk Extruder Machine** is new equipment, it is necessary to equip in Rice Mills, its principle of working is the motor drives of the rotor rotate at a low speed through the belt, and the screw conveyor plays role of the feeder in side chamber. When the **Husk** gets into the working area of pressing, the rotating screw feeder with low rotation speed are pressing them, the products which are extruded to go into the cylinder installed in front of machine and it becomes the hard endless "husk wood" products. Besides the dryer device installed nearly the cylinder makes him dry and hard immediately.
- Produce the "**Husk Wood**" from recycle of husk effectively for Rice Mill.
- Used for burner to replace the natural wood, protect environment, recycle husk to power for burner.
- The simple structure of machine, saving power.
- Easy to operate machine.
- Screw conveyor made of hardness steel
- Low maintenance costs and one-year parts warranty.

SPECIFICATIONS:

Model	Input Capacity (kG/hr)	Required power (kW)	Main shaft revolution (rpm)	Outside dimensions LxWxH (mm)			Weight (kG)
