

COFFEE GRINDER

MODEL: MN-300

FEATURES:

- The Coffee Grinder, the motor drives of the rotor rotate at a high speed through the belt, and on the rotor there are series hammers. When the materials get into the working area of hammers, the rotating hammers with high rotation speed are crushing them, the products which are crushed to meet the required size can be discharged by the outlet and become the final products, the large size products are brought back to the crushing area by the hammers for being re-crushed until they reached the required size.
- Combination with suction fan to collect prime product for small capacity machine.
- The simple structure of machine.
- Easy to operate machine.
- Hammer made of hardness stainless steel
- Low maintenance costs and one-year parts warranty.
