

CATADOR

MODEL: CR-1

FEATURES:

- Close circuit catador is designed for fine separation of heavy beans from light beans. They also separate dust, shells, immature beans, and extraneous matter from green coffee through suitable adjustment in operating speed and air quantity. They are particularly suitable for removing bean which have been attacked by insects, or discolored beans which are generally lighter than the fully matured beans.
- By nature air of their closed circuit, this catador ensures a dust free operation and help in preserving the factory environment. Catador is used after Oscillating Screen Machine to remove husk and light coffee. The coffee is fed into an air current where separation is carried out by density difference and the light matter is carried up and excited via the light outlet. The heavy beans fall on the wire screen and exit through the front of machine.
- Easy to operation machine.
- Low maintenance costs and one-year parts warranty.

DIMENSIONS:

Model	Input Capacity (T/hr)	Required power (kW)	Outside dimensions			Weight (kG)
			LxWxH (mm)			
CR-1	0.6-1	2.2	1,100	600	1,800	600
